

## We are looking for a Developer (f/m)

We are an international financial technology startup in the area of digital asset & wealth management. Within two years Fincite grew to become one of the biggest digital asset management B2B-Provider in Germany. From disruptive technology financial products like Robo Advisors, Marketplaces to Customer-Lifecycle-Management, we strive to become one of the leading european B2B-Fintechs.

### Your Responsibilities

- **Take responsibility** - As a Senior Developer you are responsible for the development of financial algorithms on our technology platform and report directly to the management team.
- **Lead** - You are able to lead a development team, to distribute work and to follow up on results.
- **Analyse** - You are capable to understand precisely, evaluate and asses mathematical models and their technical implementation.

### Your Profile

- You have in-depth knowledge of programming in C++.
- You have significant work experiences in software development (3-5 years) and ideally you have also gained experiences in leading a small team.
- Your knowledge in mathematics and statistical methods is very good and you are able to do implementations based on mathematical models.
- You are familiar with Python and ideally experienced in working with Django.
- Additionally you are able to administrate Linux servers.
- Good English skills are required.

### What we offer

While working in a young & ambitious team you will experience an open-minded and dynamic working atmosphere in a modern office neay the city center of Frankfurt. You will gain insights into the Fintech industry and the startup world with a flat hierarchy. Besides that we offer you many benefits like flexible working hours and a competitive remuneration.
