

We are looking for a Manager Data Science (f/m/d)

In a world where "human financial advice" gets more expensive by the day, Fincite supports retail banks, private banks and insurers, in offering digital, individual, and holistic investment solutions to their customers. All this seamlessly integrated into their current processes and architectures via one software - Fincite.Core. Join one of the Top 50 fastest growing companies in Germany.

Your Responsibilities

Data crunching – You manage to get most out of data. You know how to feed software with data and to digest the results accordingly. You can apply a wide range of statistical models to data in order to make the financial world a better place.

Data visualization – You know how to aesthetically present data so that the result is a compelling and insightful data story. Data visualization is not only static for you but manifests its full power in interactive form.

Alternative data sources – Explore new data frontiers.

Your Profile

Passion – You are passionate turning financial data into meaningful stories, awesome visualizations and impactful reports.

Education – You have a strong educational background in the field of data analysis, financial data, statistics or programming based on data.

Experience – Ideally you have crunched financial data in the past. Besides using Excel you are familiar with R / Rstudio, R Shiny, R Markdown, Stata, D3, ggplot2, Tableau, Highcharts and similar software.

Personality – You know how to work self-organized and are driven to bring challenges to a success. Plus you have solid English skills.

What we offer

While working in a young and ambitious team you will experience an open-minded and dynamic work environment in a modern office near the city center of Frankfurt. You will take responsibility very early in an environment with a flat hierarchy. For us every single team member and his or her voice counts. Our ambition is to grow the people in our team to leaders in their field.
