

We are looking for a Solution Manager (f/m/d)

Fincite

In a world where "human financial advice" gets more expensive by the day, we, at Fincite, support retail banks, private banks and insurers, in offering digital, individual, and holistic investment solutions to our customers. All this seamlessly integrated into their current processes and architectures via one software - Fincite.Core.

Your Responsibilities

- You review clients' product demands and ensure a smooth product implementation
- You act as a Product Owner for the product of a SCRUM development process
- You manage the implementation specialists and develop a project plan
- You are the direct contact person for the client and put customer needs first
- You ensure to define roles and responsibilities throughout the project team

Your Profile

- You have at least 2 years of experience in software development environments and possess proven experience in project management and customer service
- You have good understanding of High-Level Software Architecture
- You are passionate about working in a dynamic and international company
- You possess basic knowledge of programming in several languages
- You are characterized by excellent English communication skills, verbal and written

What we offer

While working in a young and ambitious team you will experience an open-minded and dynamic work environment in a modern office near the city center of Frankfurt. You will take responsibility very early in an environment with a flat hierarchy. For us every single team member and her or his voice counts. Our ambition is to grow the people in our team to leaders in their field.
